

Subject: PET – Stress: Smoke Gray

I have had very positive results from wearing the PET. I have had better communication with friends and clients. I have also experienced the hills of my emotional rollercoaster have become a lot smoother and easier to ride and I have less stress and feel more balanced. It has increased my self confidence and magnified my personality, giving it a magnetic effect. I can definitely tell a difference when I don't wear it. I believe it could help a lot of people. **BF. Subject: PET – Recover: Green

The PET has done all you said it would, plus more! I am more outgoing than I have ever been in my life. Crowds of people do not scare me the way they have in the past. I no longer have mini panic attacks when I answer questions in a crowd. I was always content to sit back, listen and watch rather than participate in life. In summer of 1999 I landed wrong on my leg, falling off a 5 foot wooden fence. The doctors could not find anything wrong... and told me to stay off it for a week and it would be fine. I was on crutches for 3 months before I could touch my foot to the floor... During cold weather, my leg would feel cold to the bone and ached constantly. In November I received a PET unit. I was attending my first conference in four years and I was shaking with uncertainty. After a few hours with my PET, I felt fine and had no difficulty with the crowd. I was better and was able to communicate my thoughts and directions clearly. This winter is the first since 1999 that my leg did not ache or feel bone cold. When I first began using the PET unit, I had to adjust to being warm. I love the changes this unit has made in my life. I do not ever want to be without it! I can not wait to purchase one for each family member!

Personal Energetic Trainer

The (PET) Personal Energetic Trainer has been under research and evaluation for the last year. At Innovative Concepts, we have been working with neuro-codes staging in various devices for the past fifteen years, and we feel that a proper amount neuro-codes patterns are necessary to maintain a healthy body. Neuro-Codes patterns are neurological impulses that happen hundreds to thousands of times a second in each of us, every moment of our lives. They are the functions that allow us to move our hands, neck, eyes, muscles and other parts of our bodies—necessary to keep us alive and healthy. Most people take these neurological functions for granted. What if your body didn't or couldn't transmit certain neuro-codes for some reason such as illness, injury, age or attitude? How would that person function from that point on? The limitation could be overwhelming. The PET Unit is a small package that packs a large punch! The Neuro-codes we are using are to increase the person's positive qualities in themselves. The way the PET works, is that it is able to pulse a short burst of neuro-coding sequence to the host and it's this neuro-code that the persons body receives. Once their brain or nervous system receives the signal the body starts to process the command from the PET unit. The coding sequence is so close to the neuro-codes of the host brain, that the body can't tell the difference from the host brain sending the signal or PET Unit; and the difference from the body carries out the function that it was told to do. A speed adjustment dial is able to be adjusted by the user if a stronger power setting is desired (slow=weaker/ faster = stronger). The PET codes are embedded in a way that can't be changed or altered. When the battery runs down, the user just removes the screw and replaces the battery with any AAA alkaline battery. You can safely replace the battery without losing the PET codes that are permanently programmed in the unit.

“We are not in competition with the health professions, or their systems. We are able to provide a device that can bridge the gaps in areas they can not yet reach.”

TEST: Say to yourself, “I feel sick.”

100 times in a row. Would you do it?? If not, Why? Many people know that they can talk themselves into illness, injuries and even death—by just telling themselves this one simple phrase.

If you had a unit that was small enough to slip into your business slacks, dress or purse that told you hundreds of times a second that your self confidence was getting better. Would you wear it? Most of you have heard about subliminal tapes and videos before—they work!! It's just if you have time to listen to them enough. The PET unit differs from the subliminal messages because the messages are in a format that the nervous systems respond to. With the PET you are being told to increase your self esteem, image, confidence levels far better than other conventional methods. How would a deaf / blind person respond to tapes or videos? With the PET Unit, the nervous systems process the information and make the body perform better.

Test: Now tell yourself. “I can do it!” or “I'm a winner!” hundreds of times a second. Have the self confidence to overcome the old programming you were told while you were growing up. Remember, those phrases, “ You can't do it!”, “It's too hard!”, “I can't remember!” or “You won't amount to anything when you get older.” Sad, but there are old programs still running in each of us each second of the day. If you were offered a tool that over time would not erase the negative phrases, but drown them out with new positive winning statements, wouldn't you want to try it?

“At any given time our body believes that we are in perfect health, even though we may be sliding down hill. The simple fact is the neurological body has no reference or memory of ideal health. The P E T provides that ideal reference point for the body/system to adjust back too. ”

Quoted by Alan W. Back ,N.D.

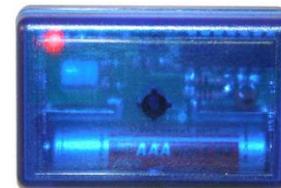

Research Findings:

Subject: PET - Focus: Blue

My school performance has increased. I've had less test anxiety, more study focus and a quicker mental response. What family contact I've had has been smooth. There has also been a lot of self growth for me... I feel like I've been on an emotional growth spurt. Communication with others has been the most significant change. I feel more understood... it's easier to express what I want to say... words pop into my mind more quickly. I have better focus while I'm talking and listening. I have also had more confidence in what I am saying... My mental focus has increased as well as my memory skills. I have felt more magnetic, especially around friends at school. I misplaced the unit for a week and couldn't believe the difference! I had confusion, my ability to communicate, to understand and be understood dramatically decreased. I was more forgetful and depressed... and lacked concentration. After finding it in the laundry basket, I will not lose it again!

Thank You!

Bonnie W., D.C.

Subject: PET - Performance: RED

Thank You, for the opportunity to wear and test the PET. When the PET was offer to me, my first reaction was – are you kidding? What a Joke! Then my mental wheels starting turning, Why not! Just maybe there is something to help the hopeless depression and the mountain of volatile anger I seem to be carrying. Better the PET then medicine or a shrink. Each day I put the PET in my pocket and then forgot it, and expecting nothing. What a surprise! A good example: I played golf once a week (without the PET with great anger – I scored 85) The next week I remember to wear the PET while I played golf I made a couple of bad putts and still scored a 74!! Wow, I would normally let the game go down the tubes and finished badly. I found that while wearing the PET I could not dwell on the over putts and came back with long perfect putts “eagles” back to back. I was “On Fire” while me teammates watched I could do nothing wrong. I'm very thankful for using the PET and proving the benefits to me.

What A game!!

Thank you! P. McE.
